PROFESSIONAL SUMMARY

Java Full Stack Developer with 6+ years of experience designing, building, and maintaining scalable backend services and RESTful APIs, gRPC using Core Java, Spring Boot, and Spring MVC in microservices architectures. Experienced across the full software development life cycle, from requirements elicitation and design discussions through coding, code reviews, testing, and production support, in Agile team environments. Skilled in event-driven integration using Kafka, frontend development with React and Angular, and database work across SQL Server, Oracle, MySQL, and MongoDB. Hands-on experience integrating Generative AI and Agentic AI capabilities, including LLM-powered features and RAG pipelines, into Java-based applications. Proficient in Python, AWS, Docker, and Kubernetes, with a collaborative mindset and strong communication and analytical skills.

TECHNICAL SKILLS

Languages: Core Java (Java 8, Java 17, Java 21), Python, SQL, TypeScript, JavaScript

Backend: Spring Boot, Spring MVC, Spring Security, Spring Data, JPA, REST APIs, gRPC, Microservices

Frontend: React, Angular, HTML5, CSS3, Redux

Messaging and Integration: Kafka, Event-Driven Architecture, Asynchronous Processing, MQ

AI and GenAI: Generative AI, Agentic AI, LLMs, AI Agents, Retrieval-Augmented Generation (RAG), Prompt Engineering, AI-Assisted Development

Databases: SQL Server, Oracle, MySQL, PostgreSQL, MongoDB, PL/SQL

Cloud and DevOps: AWS, Docker, Kubernetes, Jenkins, CI/CD, Git

Observability: Observability, Distributed Tracing, Application Monitoring, Structured Logging

Testing: JUnit, Mockito, Test Frameworks, Selenium

Design and Architecture: Design Patterns, MVC, System Design, API Design

Methodologies: Agile, Scrum, SDLC, Code Reviews, Requirements Elicitation, Production Support

PROFESSIONAL EXPERIENCE

Java Full Stack Developer

Feb 2024 -- Present

Verizon, St. Louis, MO

- Designed, developed, and maintained Java Spring Boot microservices and RESTful APIs for a customer self-service portal supporting over 200,000 monthly active users for eligibility workflows, plan upgrades, and account management.
- Built a full-stack Generative AI and Agentic AI-powered troubleshooting assistant using LLMs and RAG pipelines integrated into the Java backend, reducing in-home technician site visits by 28% within the first two quarters.
- Designed and implemented REST API endpoints connecting React-based front-end portals to backend telecom provisioning and billing systems, reducing average API response time by 35%.
- Built Java Spring Boot microservices integrated with Kafka, processing over million device diagnostic events per month, with services containerized using Docker and orchestrated on Kubernetes.
- Added observability into the AI assistant and diagnostic microservices through structured logging and distributed tracing, supporting faster investigation of production failures.
- Participated in requirements elicitation and design discussions with cross-functional stakeholders, translating business requirements into technical specifications and actionable development tasks.
- Conducted code reviews, maintained code repositories, and implemented test strategies using JUnit and Mockito to uphold software quality standards.
- Actively participated in resolving production issues and recommended preventive strategies, delivering 20+ features across 12 biweekly Agile sprint cycles with a sprint completion rate above 90%.

Java Backend Developer

Aug 2021 -- Aug 2023

Bank of Montreal, Chennai, India

- Designed, developed, and maintained Java Spring Boot microservices for a home mortgage loan origination platform, building RESTful web services for loan intake, underwriting, and approval workflows processing over 8,000 applications per month.
- Integrated Kafka for event-driven processing of underwriting workflow events, handling daily events with improved throughput and reliability.
- Designed and optimized SQL Server database schemas and stored procedures for loan and underwriting data, supporting reporting queries across 8,000+ monthly loan records.
- Developed responsive front-end interfaces using Angular and JSON-driven dynamic forms, cutting average application completion time by 25%.
- Implemented Spring Security with OAuth 2.0 and JWT-based authentication for customer-facing loan portals, supporting 99.9% uptime.
- Executed test plans, analyzed outcomes, and coordinated bug fixes with the development team, building and maintaining CI/CD pipelines using Jenkins and Docker that reduced deployment time from 2 hours to 20 minutes.
- Monitored and troubleshooted live applications, documenting coding practices and technical solutions to support ongoing system maintenance and team knowledge sharing.

Java Developer

Feb 2020 -- Jun 2021

Capco, Bangalore, India

- Developed and maintained Java and Spring Boot backend services and RESTful APIs for a policy management application, supporting over 10,000 policy transactions per month for an insurance client.
- Built and managed 12+ REST API endpoints for policy quoting, underwriting, and claims processing across 3 insurance product lines using a microservices-based architecture.
- Automated claims data processing workflows in Core Java and Spring Boot, reducing manual claims processing time by 40% for a team handling 2,000+ claims monthly.
- Optimized PostgreSQL and Oracle database schemas and queries supporting policy and claims data, improving average query performance by 20% across reporting dashboards.
- Participated in design discussions and documented software specifications, conducting code reviews, debugging, and performance tuning to maintain code quality.
- Collaborated with business analysts and QA teams to translate requirements into technical specifications, contributing to a 15% reduction in production defects.

EDUCATION

Master of Science in Applied Computer Science

Northwest Missouri State University, Maryville, MO

Bachelor of Technology, Computer Science

Crescent University, Chennai, India

CERTIFICATIONS

- AWS Certified Developer -- Associate
- Oracle Certified Professional, Java SE Developer
